

Fixture clamp, concentric clamping

max. clamping force 9.5 kN and 15 kN, jaw width 40 and 65 mm
double acting, max. operating pressure 250 bar

Advantages

- Very compact design
- High rigidity
- Repetitive accuracy ± 0.02 mm
- 2 sizes
- Strokes 5 and 8 mm
- Double-acting function
- Fixtures without tubes possible
- Exchangeable jaws
- Good swarf protection
- Port for central lubrication
- Mounting position: variable

Function

Application

The fixture clamps are used for machining of dimensionally stable workpieces in single or multiple clamping fixtures.

Due to their compact design they can be arranged in a very limited space. Fixture clamps are especially suitable for series manufacturing in automated mode.

The double-acting cylinder function combined with central lubrication and good swarf protection guarantees a high process safety.

Description

The fixture clamp with concentric clamping function consists of a very slim basic body with 2 integrated hydraulic cylinders. The piston forces are transferred via a guided connecting link to the two clamping slides so that a centric synchronism is obtained.

All threads and ports are at the bottom to allow a space-saving arrangement of several clamping points in a very limited space.

If fixing from below is not possible an adaptor plate for manifold mounting or tube connection is available. As accessory also blanks of clamping jaws are available for adaptation to the workpiece contour.

Fitting connection

Accessories

Clamping jaws and adaptor plate are not included in the delivery of the fixture clamp and have to be ordered separately as accessory.

Important notes

The fixture clamp is only suitable for exterior clamping.

Lubricate at the latest after 500 clamping cycles the clamping slide via the central lubrication.

Never use the complete clamping stroke to guarantee safe clamping of the workpiece.

Max. operating temperature 80 °C.

Operating conditions and other data see data sheet A 0.100.

Application example

Concentric clamping of 8 flanges on a rotary indexing fixture.

Clamping stroke 5 mm: Part-no. 4413-050

Technical characteristics

Clamping force max.	[kN]	9.5
Release force	[kN]	1
Min. operating pressure	[bar]	20
Clamping stroke	[mm]	5
Jaw width	[mm]	40
Max. flow rate	[cm³/s]	70
Stroke volume		
Clamping	[cm³]	3.8
Unclamping	[cm³]	2.2
Weight	[kg]	approx. 2.36

Adaptor plate (accessory)

Weight	[kg]	approx. 1.9
Part-no.		0441-305

Clamping force diagram

Clamping stroke 8 mm: Part-no. 4413-150

Technical characteristics

Clamping force max.	[kN]	15
Release force	[kN]	1
Min. operating pressure	[bar]	20
Clamping stroke	[mm]	8
Jaw width	[mm]	65
Max. flow rate	[cm ³ /s]	100
Stroke volume		
Clamping	[cm ³]	9,85
Unclamping	[cm ³]	4,4
Weight	[kg]	approx. 6

Adaptor plate (accessory)

Weight [kg] approx. 3,5
Part-no. 0441-315

For fixture clamp 4413-050

Clamping jaw blank 40 mm
Part-no. 3548-070

For fixture clamp 4413-150

Clamping jaw blank 65 mm
Part-no. 3548-071

Self-made clamping jaws

Clamping jaws are manufactured according to the contour of the workpiece to be clamped.

The max. height of the clamping jaw X at 250 bar operating pressure is indicated in the below charts.

If the operating pressure is lower, the clamping jaws can be designed higher as per the below diagrams.

Important note

The clamping jaws must always be supported by the provided support, since the fixing screws are not in the position to compensate the generated clamping forces.

Max. height of the clamping jaws X for 4413-050 at max. operating pressure of 250 bar

Fixing screws for clamping jaws	M6x16 - 12.9
X [mm] with 2 screws	15
X [mm] with 4 screws	36

Max. height of the clamping jaw X for 4413-050 as a function of the operating pressure

Fixing of the clamping jaws

Max. height of the clamping jaws X for 4413-150 at max. operating pressure of 250 bar

Fixing screws for clamping jaws	M8x25 - 12.9
X [mm] with 2 screws	25
X [mm] with 4 screws	78

Max. height of the clamping jaw X for 4413-150 as a function of the operating pressure
